

visual sighting distance or within 0.25 nm (463 m) as determined by electronic navigational equipment, of its commercial vertical hook-and-line gear.

(3) A buoy used to mark fixed gear under paragraph (c)(1)(i) or (c)(2) of this section must be marked with a number clearly identifying the owner or operator of the vessel. The number may be either:

(i) If required by applicable state law, the vessel's number, the commercial fishing license number, or buoy brand number; or

(ii) The vessel documentation number issued by the USCG, or, for an undocumented vessel, the vessel registration number issued by the state.

(d) *Set nets.* Fishing for groundfish with set nets is prohibited in the fishery management area north of 38°00' N. lat.

(e) *Traps or pots.* Traps must have biodegradable escape panels constructed with # 21 or smaller untreated cotton twine in such a manner that an opening at least 8 inches (20.3 cm) in diameter results when the twine deteriorates.

(f) *Recreational fishing.* The only types of fishing gear authorized for recreational fishing are hook-and-line and spear.

(g) *Spears.* Spears may be propelled by hand or by mechanical means.

§ 660.323 Catch restrictions.

(a) Groundfish species harvested in the territorial sea (0–3 nm) will be counted toward the catch limitations in this section.

(1) *Black rockfish.* The trip limit for black rockfish (*Sebastes melanops*) for commercial fishing vessels using hook-and-line gear between the U.S.-Canada border and Cape Alava (48°09'30" N. lat.), and between Destruction Island (47°40' N. lat.) and Leadbetter Point (46°38'10" N. lat.), is 100 lbs (45 kg) or 30 percent, by weight of all fish on board, whichever is greater, per vessel per fishing trip.

(2) *Nontrawl sablefish.* This paragraph (a)(2) applies to the regular and mop-up seasons for the nontrawl limited entry sablefish fishery north of 36° N. lat., except for paragraphs (a)(2)(ii), (iv), and (vii) of this section, which also apply to the open access fishery north of 36° N.

lat. Limited entry and open access fixed gear sablefish fishing south of 36° N. lat. is governed by routine management measures imposed under paragraph (b) of this section.

(i) *Sablefish endorsement.* A vessel may not participate in the regular or mop-up season for the nontrawl limited entry fishery, unless the vessel's owner holds (by ownership or otherwise) a limited entry permit for that vessel, affixed with both a gear endorsement for longline or trap (or pot) gear, and a sablefish endorsement.

(ii) *Pre-season closure—open access and limited entry fisheries.* (A) Sablefish taken with fixed gear in the limited entry or open access fishery in the EEZ may not be retained or landed during the 48 hours immediately before the start of the regular season for the nontrawl limited entry sablefish fishery.

(B) All fixed gear used to take and retain groundfish must be out of EEZ waters during the 48 hours immediately before the opening of the regular season for the nontrawl limited entry sablefish fishery.

(iii) *Regular season—nontrawl limited entry sablefish fishery.* (A) The Regional Administrator will announce a season for waters north of 36° N. lat. to start on any day from August 1 through September 30, based on consultations with the Council, taking into account tidal conditions, Council meeting dates, alternative fishing opportunities, and industry comments.

(B) During the regular season, each vessel with a limited entry permit with a sablefish endorsement that is registered for use with that vessel may land up to the cumulative trip limit announced for the tier to which the permit is assigned. Each permit will be assigned to one of three tiers. A cumulative trip limit is the maximum amount of sablefish that may be taken and retained, possessed, or landed per vessel in a specified period of time, with no limit on the number of landings or trips.

(C) The Regional Administrator will annually calculate the length of the regular season and the size of the cumulative trip limit for each tier in accordance with the process specified in chapter 1 of the EA/RIR/IRFA for

“Fixed Gear Sablefish Tiered Cumulative Limits,” dated February 1998, which is available from the Council. The season length and the size of the cumulative trip limits will vary depending on the amount of sablefish available for the regular and mop-up fisheries and the projected harvest for the fishery. The season will be set to be as long as possible, under the constraints described in chapter 1 of the EA/RIR/IRFA, up to a maximum season length of 10 days.

(D) During the regular and mop-up season, limited entry nontrawl sablefish fishers may also be subject to trip limits to protect juvenile sablefish.

(E) There will be no limited entry, daily trip limit fishery during the regular season.

(iv) *Post-season closure—limited entry and open access.* No sablefish taken with fixed gear north of 36° N. lat. during the 30 hours immediately after the end of the regular season for the nontrawl limited entry sablefish fishery, may be retained. Sablefish taken and retained during the regular season may be possessed and landed during the 30-hour period. Gear may remain in water during the 30-hour post-season closure. Fishers may not set or pull from the water fixed gear used to take and retain groundfish during the 30-hour post-season closure.

(v) *Mop-up season—limited entry fishery.* A mop-up season to take the remainder of the limited entry nontrawl allocation will begin in waters north of 36° N. lat. about 3 weeks, or as soon as practicable, after the end of the regular season. During the mop-up fishery, a cumulative trip limit will be imposed. A cumulative trip limit is the maximum amount of sablefish that may be taken and retained, possessed, or landed per vessel in a specified period of time, with no limit on the number of landings or trips. The length of the mop-up season and the amount of the cumulative trip limit, will be determined by the Regional Administrator in consultation with the Council or its designees, and will be based primarily on the amount of fish remaining in the limited entry nontrawl allocation, the amount of sablefish needed for the remainder of the daily trip limit fishery, and the number of mop-up participants

anticipated. The Regional Administrator may determine that too little of the nontrawl allocation remains to conduct an orderly or manageable fishery, in which case there will not be a mop-up season. There will be no limited entry daily trip limit fishery during the mop-up season.

(vi) *Other announcements.* The dates and times that the regular season starts and ends (and trip limits on sablefish of all sizes are resumed), the size of the cumulative trip limits for the three tiers in the regular fishery, the dates and times for the 30-hour post-season closure, the dates and times that the mop-up season begins and ends, and the size of the cumulative trip limit for the mop-up fishery will be announced in the FEDERAL REGISTER, and may be modified. Unless otherwise announced, these seasons will begin and end at 12 noon on the specified date.

(vii) *Trip limits.* Trip and/or frequency limits may be imposed in the limited entry fishery before and after the regular season, and after the mop-up season, under paragraph (b) of this section. Trip and/or size limits to protect juvenile sablefish in the limited entry or open-access fisheries also may be imposed at any time under paragraph (b) of this section. Trip limits may be imposed in the open-access fishery at any time under paragraph (b) of this section.

(3) *Pacific whiting (whiting)*—(i) *Seasons.* The primary seasons for the whiting fishery are: For the shore-based sector, the period(s) when the large-scale target fishery is conducted (when trip limits under paragraph (b) of this section are not in effect); for catcher/processors, the period(s) when at-sea processing is allowed and the fishery is open for the catcher/processor sector; and for vessels delivering to motherships, the period(s) when at-sea processing is allowed and the fishery is open for the mothership sector. Before and after the primary seasons, trip landing or frequency limits may be imposed under paragraph (b) of this section. The sectors are defined at paragraph (a)(4) of this section.

(A) *North of 40°30' N. lat.* Different starting dates may be established for the catcher/processor sector, the

mothership sector, catcher vessels delivering to shoreside processors north of 42° N. lat., and catcher vessels delivering to shoreside processors between 42°–40°30' N. lat.

(1) *Procedures.* The primary seasons for the whiting fishery north of 40°30' N. lat. generally will be established according to the procedures in the PCGFMP for developing and implementing annual specifications and apportionments. The season opening dates remain in effect unless changed, but will be announced annually, generally with the annual specifications and management measures.

(2) *Criteria.* The start of a primary season may be changed based on a recommendation from the Council and consideration of the following factors, if applicable: Size of the harvest guidelines for whiting and bycatch species; age/size structure of the whiting population; expected harvest of bycatch and prohibited species; availability and stock status of prohibited species; expected participation by catchers and processors; environmental conditions; timing of alternate or competing fisheries; industry agreement; fishing or processing rates; and other relevant information.

(B) *South of 40°30' N. lat.* The primary season starts on April 15 south of 40°30' N. lat.

(ii) *Closed areas.* Pacific whiting may not be taken and retained in the following portions of the fishery management area:

(A) *Klamath River Salmon Conservation Zone.* The ocean area surrounding the Klamath River mouth bounded on the north by 41°38'48" N. lat. (approximately 6 nm north of the Klamath River mouth), on the west by 124°23' W. long. (approximately 12 nm from shore), and on the south by 41°26'48" N. lat. (approximately 6 nm south of the Klamath River mouth).

(B) *Columbia River Salmon Conservation Zone.* The ocean area surrounding the Columbia River mouth bounded by a line extending for 6 nm due west from North Head along 46°18' N. lat. to 124°13'18" W. long., then southerly along a line of 167 True to 46°11'06" N. lat. and 124°11' W. long. (Columbia River Buoy), then northeast along Red Buoy Line to the tip of the south jetty.

(iii) *Eureka area trip limits.* Trip landing or frequency limits may be established, modified, or removed under §660.321 or §660.323, specifying the amount of Pacific whiting that may be taken and retained, possessed, or landed by a vessel that, at any time during a fishing trip, fished in the fishery management area shoreward of the 100-fathom (183-m) contour (as shown on NOAA Charts 18580, 18600, and 18620) in the Eureka area (from 43°00' to 40°30' N. lat.).

(iv) *At-sea processing.* Whiting may not be processed at sea south of 42°00' N. lat. (Oregon-California border), unless by a waste-processing vessel as authorized under paragraph (a)(4)(vii) of this section.

(v) *Time of day.* Pacific whiting may not be taken and retained by any vessel in the fishery management area south of 42°00' N. lat. between 0001 hours to one-half hour after official sunrise (local time). During this time south of 42°00' N. lat., trawl doors must be on board any vessel used to fish for whiting and the trawl must be attached to the trawl doors. Official sunrise is determined, to the nearest 5° lat., in *The Nautical Almanac* issued annually by the Nautical Almanac Office, U.S. Naval Observatory, and available from the U.S. Government Printing Office.

(4) *Whiting—allocation—(i) Sectors and allocations.* The commercial harvest guideline for whiting is allocated among three sectors, as follows.

(A) *Sectors.* The catcher/processor sector is composed of catcher/processors, which are vessels that harvest and process whiting during a calendar year. The mothership sector is composed of motherships and catcher vessels that harvest whiting for delivery to motherships. Motherships are vessels that process, but do not harvest, whiting during a calendar year. The shoreside sector is composed of vessels that harvest whiting for delivery to shore-based processors.

(B) *Allocations.* The allocations are: 34 percent for the catcher/processor sector; 24 percent for the mothership sector; and 42 percent for the shoreside sector. No more than 5 percent of the shoreside allocation may be taken and retained south of 42° N. lat. before the

start of the primary season north of 42° N. lat. These allocations are harvest guidelines unless otherwise announced in the FEDERAL REGISTER.

(ii) *Additional restrictions on catcher/processors.*

(A) A catcher/processor may receive fish from a catcher vessel, but that catch is counted against the catcher/processor allocation unless the catcher/processor has been declared as a mothership under paragraph (a)(4)(ii)(C) of this section.

(B) A catcher/processor may not also act as a catcher vessel delivering unprocessed whiting to another processor in the same calendar year.

(C) When renewing its limited entry permit each year under § 660.333, the owner of a catcher/processor used to take and retain whiting must declare if the vessel will operate solely as a mothership in the whiting fishery during the calendar year to which its limited entry permit applies. Any such declaration is binding on the vessel for the calendar year, even if the permit is transferred during the year, unless it is rescinded in response to a written request from the permit holder. Any request to rescind a declaration must be made by the permit holder and granted in writing by the Regional Director before any unprocessed whiting has been taken on board the vessel that calendar year.

(iii) *Reaching an allocation.* If the whiting harvest guideline, commercial harvest guideline, or a sector's allocation is reached, or is projected to be reached, the following action(s) for the applicable sector(s) may be taken as provided under paragraph (a)(4)(vi) of this section and will remain in effect until additional amounts are made available the next fishing year or under paragraph (a)(4)(iv) of this section.

(A) *Catcher/processor sector.* Further taking and retaining, receiving, or at-sea processing of whiting by a catcher/processor is prohibited. No additional unprocessed whiting may be brought on board after at-sea processing is prohibited, but a catcher/processor may continue to process whiting that was on board before at-sea processing was prohibited.

(B) *Mothership sector.* (1) Further receiving or at-sea processing of whiting

by a mothership is prohibited. No additional unprocessed whiting may be brought on board after at-sea processing is prohibited, but a mothership may continue to process whiting that was on board before at-sea processing was prohibited.

(2) Whiting may not be taken and retained, possessed, or landed by a catcher vessel participating in the mothership sector.

(C) *Shoreside sector.* Whiting may not be taken and retained, possessed, or landed by a catcher vessel participating in the shoreside sector except as authorized under a trip limit specified under § 660.323(b).

(D) *Shoreside south of 42° N. lat.* If 5 percent of the shoreside allocation for whiting is taken and retained south of 42° N. lat. before the primary season for the shoreside sector begins north of 42° N. lat., then a trip limit specified under paragraph (b) of this section may be implemented south of 42° N. lat. until the northern primary season begins, at which time the southern primary season would resume.

(iv) *Reapportionments.* That portion of a sector's allocation that the Regional Director determines will not be used by the end of the fishing year shall be made available for harvest by the other sectors, if needed, in proportion to their initial allocations, on September 15 or as soon as practicable thereafter. NMFS may release whiting again at a later date to ensure full utilization of the resource. Whiting not needed in the fishery authorized under § 660.324 also may be made available.

(v) *Estimates.* Estimates of the amount of whiting harvested will be based on actual amounts harvested, projections of amounts that will be harvested, or a combination of the two. Estimates of the amount of whiting that will be used by shoreside processors by the end of the fishing year will be based on the best information available to the Regional Director from state catch and landings data, the survey of domestic processing capacity and intent, testimony received at Council meetings, and/or other relevant information.

(vi) *Announcements.* The Assistant Administrator will announce in the FEDERAL REGISTER when a harvest

guideline, commercial harvest guideline, or an allocation of whiting is reached, or is projected to be reached, specifying the appropriate action being taken under paragraph (a)(4)(iii) of this section. The Regional Director will announce in the FEDERAL REGISTER any reapportionment of surplus whiting to other sectors on September 15, or as soon as practicable thereafter. In order to prevent exceeding the limits or to avoid underutilizing the resource, prohibitions against further taking and retaining, receiving, or at-sea processing of whiting, or reapportionment of surplus whiting may be made effective immediately by actual notice to fishermen and processors, by phone, fax, Northwest Region computerized bulletin board (contact 206-526-6128), letter, press release, and/or U.S. Coast Guard Notice to Mariners (monitor channel 16 VHF), followed by publication in the FEDERAL REGISTER, in which instance public comment will be sought for a reasonable period of time thereafter. If insufficient time exists to consult with the Council, the Regional Director will inform the Council in writing of actions taken.

(vii) *Processing fish waste at sea.* A vessel that processes only fish waste (a "waste-processing vessel") is not considered a whiting processor and therefore is not subject to the allocations, seasons, or restrictions for catcher/processors or motherships while it operates as a waste-processing vessel. However, no vessel may operate as a waste-processing vessel 48 hours immediately before and after a primary season for whiting in which the vessel operates as a catcher/processor or mothership. A vessel must meet the following conditions to qualify as a waste-processing vessel:

(A) The vessel makes meal (ground dried fish), oil, or minced (ground flesh) product, but does not make, and does not have on board, surimi (fish paste with additives), fillets (meat from the side of the fish, behind the head and in front of the tail), or headed and gutted fish (head and viscera removed).

(B) The amount of whole whiting on board does not exceed the trip limit (if any) allowed under paragraph (b) of this section.

(C) Any trawl net and doors on board are stowed in a secured and covered manner, and detached from all towing lines, so as to be rendered unusable for fishing.

(D) The vessel does not receive codends containing fish.

(E) The vessel's operations are consistent with applicable state and Federal law, including those governing disposal of fish waste at sea.

(b) *Routine management measures.* In addition to the catch restrictions in this section, other catch restrictions that are likely to be adjusted on an annual or more frequent basis may be imposed and announced by a single notification in the FEDERAL REGISTER if they first have been designated as "routine" according to the applicable procedures in the PCGFMP. The following catch restrictions are designated as routine for the reasons given in paragraph (b)(1)(ii) of this section:

(1) *Commercial-limited entry and open access fisheries—*

(i) *Species and gear.* (A) Widow rockfish—all gear—trip landing and frequency limits.

(B) *Sebastes* complex—all gear—trip landing and frequency limits.

(C) Yellowtail rockfish—all gear—trip landing and frequency limits.

(D) Pacific ocean perch—all gear—trip landing and frequency limits.

(E) Sablefish—all gear—trip landing, frequency, and size limits.

(F) Dover sole—all gear—trip landing and frequency limits.

(G) Thornyheads (shortspine thornyheads or longspine thornyheads, separately or combined)—all gear—trip landing and frequency limits.

(H) Bocaccio—all gear—trip landing and frequency limits.

(I) Pacific whiting—all gear—trip landing and frequency limits.

(J) Lingcod—all gear—trip landing and frequency limits; size limits.

(K) Canary rockfish—all gear—trip landing and frequency limits.

(L) All groundfish, separately or in any combination—any legal open access gear (including non-groundfish trawl gear used to harvest pink shrimp, spot or ridgeback prawns, California halibut or sea cucumbers in accordance with the regulations in this subpart)—trip landing and frequency limits. (Size

limits designated routine in this section continue to apply.)

(ii) *Reasons for “routine” management measures.* All routine management measures on commercial fisheries are intended to keep landings within the harvest levels announced by NMFS. In addition, the following reasons apply:

(A) Trip landing and frequency limits—to extend the fishing season; to minimize disruption of traditional fishing and marketing patterns; to reduce discards; to discourage target fishing while allowing small incidental catches to be landed; to allow small fisheries to operate outside the normal season; and, for the open access fishery only, to maintain landings at the historical proportions during the 1984–88 window period.

(B) Size limits—to protect juvenile fish; to extend the fishing season.

(2) *Recreational*—(i) *Species and gear.*

(A) Lingcod—all gear—bag and size limits.

(B) Rockfish—all gear—bag limits.

(ii) *Reasons for “routine” management measures.* All routine management measures on recreational fisheries are intended to keep landings within the harvest levels announced by NMFS. In addition, the following reasons apply:

(A) Bag limits—to spread the available catch over a large number of anglers; to avoid waste; for consistency with state regulations.

(B) Size limits—to protect juvenile fish; to enhance the quality of the recreational fishing experience; for consistency with state regulations.

(c) *Prohibited species.* Groundfish species or species groups under the PCGFMP for which quotas have been achieved and the fishery closed are prohibited species. In addition, the following are prohibited species:

(1) Any species of salmonid.

(2) Pacific halibut.

(3) Dungeness crab caught seaward of Washington or Oregon.

[61 FR 34572, July 2, 1996; 61 FR 37843, July 22, 1996; 61 FR 48643, Sept. 16, 1996; 62 FR 27522, May 20, 1997; 62 FR 45356, Aug. 27, 1997; 63 FR 38113, July 15, 1998]

§ 660.324 Pacific Coast treaty Indian fisheries.

(a) Pacific Coast treaty Indian tribes have treaty rights to harvest ground-

fish in their usual and accustomed fishing areas in U.S. waters.

(b) For the purposes of this part, Pacific Coast treaty Indian tribes means the Hoh, Makah, and Quileute Indian Tribes and the Quinault Indian Nation.

(c) The Pacific Coast treaty Indian tribes' usual and accustomed fishing areas within the fishery management area (FMA) are set out below in paragraphs (c)(1) through (c)(4) of this section. Boundaries of a tribe's fishing area may be revised as ordered by a Federal court.

(1) *Makah*—That portion of the FMA north of 48°02'15" N. lat. (Norwegian Memorial) and east of 125°44'00" W. long.

(2) *Quileute*—That portion of the FMA between 48°07'36" N. lat. (Sand Point) and 47°31'42" N. lat. (Queets River) and east of 125°44'00" W. long.

(3) *Hoh*—That portion of the FMA between 47°54'18" N. lat. (Quillayute River) and 47°21'00" N. lat. (Quinault River) and east of 125°44'00" W. long.

(4) *Quinault*—That portion of the FMA between 47°40'06" N. lat. (Destruction Island) and 46°53'18" N. lat. (Point Chehalis) and east of 125°44'00" W. long.

(d) *Procedures.* The rights referred to in paragraph (a) of this section will be implemented by the Secretary, after consideration of the tribal request, the recommendation of the Council, and the comments of the public. The rights will be implemented either through an allocation of fish that will be managed by the tribes, or through regulations in this section that will apply specifically to the tribal fisheries. An allocation or a regulation specific to the tribes shall be initiated by a written request from a Pacific Coast treaty Indian tribe to the Regional Director, prior to the first of the Council's two annual groundfish meetings. The Secretary generally will announce the annual tribal allocation at the same time as the annual specifications. The Secretary recognizes the sovereign status and co-manager role of Indian tribes over shared Federal and tribal fishery resources. Accordingly, the Secretary will develop tribal allocations and regulations under this paragraph in consultation with the affected tribe(s) and, insofar as possible, with tribal consensus.
